TROPICAL CYCLONE BULLETIN NR. 10
Super Typhoon FRANCISCO (MEKKHALA)

Issued at 5:00 AM, 23 June 2026
Valid for broadcast until the next bulletin at 11:00 AM today.

SUPER TYPHOON FRANCISCO MAINTAINS ITS STRENGTH WHILE SLOWING DOWN FURTHER OVER THE SEA EAST OF NORTHERN LUZON.

Location of Center (4:00 AM)

The center of the eye of Super Typhoon FRANCISCO was estimated based on all available data at **410 km East of Aparri, Cagayan (18.5°N, 125.5°E).**

Intensity

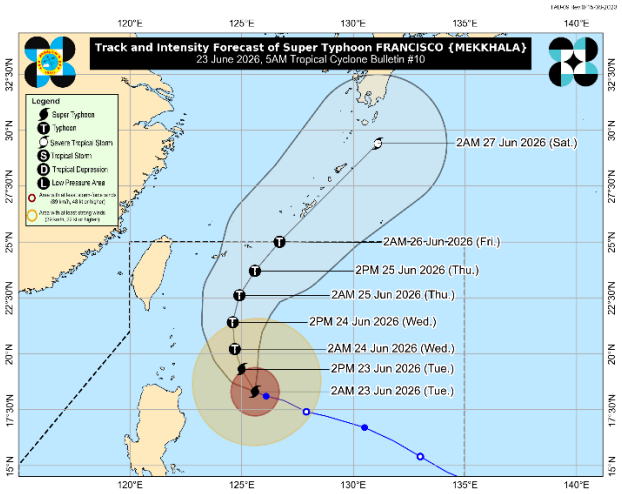
Maximum sustained winds of **185 km/h** near the center, gustiness of up to **230 km/h**, and central pressure of **940 hPa.**

Present Movement

West northwestward at 10 km/h

Extent of Tropical Cyclone Winds

Strong to typhoon-force winds extend outwards up to **360 km** from the center



TRACK AND INTENSITY FORECAST

Date and Time	Center Position			Intensity		Movement dir. and speed (km/h)

TROPICAL CYCLONE BULLETIN NR. 10
Super Typhoon FRANCISCO (MEKKHALA)
Issued at 5:00 AM, 23 June 2026
Valid for broadcast until the next bulletin at 11:00 AM today.

TROPICAL CYCLONE WIND SIGNALS (TCWS) IN EFFECT			
TCWS No.	**Luzon**	**Visayas**	**Mindanao**
1 Wind threat: **Strong winds**	**Batanes, the northeastern portion of Cagayan** (Gonzaga, Santa Ana) **including the eastern portion of Babuyan Islands** (Babuyan Is., Didicas Is., Camiguin Is.,)	-	-
	Warning lead time: **36 hours** Range of wind speeds: **39 to 61 km/h (Beaufort 6 to 7)** Potential impacts of winds: **Minimal to minor threat to life and property**		

OTHER HAZARDS AFFECTING LAND AREAS

Heavy Rainfall Outlook

Refer to **Weather Advisory No. 5 issued at 5:00 AM today** for the heavy rainfall outlook due to Tropical Cyclone FRANCISCO and the Southwest Monsoon.

Severe Winds

The wind signals warn the public of the general wind threat over an area due to the tropical cyclone. Local winds may be slightly stronger/enhanced in coastal and upland/mountainous areas exposed to winds. Winds are less strong in areas sheltered from the prevailing wind direction.

- **Minimal to minor impacts** from strong winds are possible within any of the areas under Wind Signal No. 1.

Should there be a significant westward shift in the forecast track, **Wind Signal No.2** may be hoisted in some localities of Babuyan Islands and Batanes. However, this scenario is becoming less likely as FRANCISCO is now moving a more northwestward track.

The Southwest Monsoon and the periphery of FRANCISCO will bring **strong to gale-force gusts** over the following areas (especially in coastal and upland areas exposed to winds):

- **Today:** Most of Luzon, Visayas, Zamboanga Peninsula, Northern Mindanao, Surigao del Norte, Dinagat Islands, Davao Occidental, and Davao Oriental.
- **Tomorrow (24 June)**: Most of Luzon, Visayas, Misamis Occidental, Lanao del Norte, Camiguin, Dinagat Islands, Davao Occidental, and Davao Oriental.
- **Thursday (25 June):** Most of Luzon, Panay Island, Negros Occidental, and Northern Samar

TROPICAL CYCLONE BULLETIN NR. 10
Super Typhoon FRANCISCO (MEKKHALA)
Issued at 5:00 AM, 23 June 2026
Valid for broadcast until the next bulletin at 11:00 AM today.

HAZARDS AFFECTING COASTAL WATERS

A more westward shift in track may result into raising of Gale Warning today especially over the eastern seaboards of Batanes and Babuyan Islands.

24-Hour Sea Condition Outlook

Up to rough seas over the following coastal waters:

- **Up to 4.0 m:** The eastern seaboards of Batanes and Babuyan Islands.
- **Up to 3.5 m:** The northeastern seaboard of mainland Cagayan.
- **Up to 3.0 m:** The remaining seaboards of Batanes and Cagayan; the eastern seaboards of Isabela and northern Aurora.
- **Mariners of small seacrafts, including all types of motorbancas, are advised not to venture out to sea under these conditions, especially if inexperienced or operating ill-equipped vessels.**

Up to moderate seas over the following coastal waters:

- **Up to 2.5 m:** The remaining seaboard of Aurora; the northern and eastern seaboards of Polillo Islands and Catanduanes; the northern seaboards of Camarines Norte and Camarines Sur; the eastern seaboard of Davao Oriental.
- **Up to 2.0 m:** The seaboard of northern Quezon; the northern seaboard of Ilocos Norte; the northern and eastern seaboards of Northern Samar; the eastern seaboards of Albay, Sorsogon, Eastern Samar, Dinagat Islands, and Surigao del Sur; the eastern and southern seaboards of Davao Occidental; the southern seaboard of Davao Oriental.
- **Mariners of motorbancas and similarly sized vessels are advised to take precautionary measures while venturing out to sea and, if possible, avoid navigation under these conditions.**

Other coastal waters have forecast wave heights of less than 2.0 m.

TRACK AND INTENSITY OUTLOOK

- **It must be emphasized that heavy rainfall and severe winds may still be experienced in localities outside the forecast confidence cone. Refer to "Other Hazards affecting Land Areas" for more details. Furthermore, the track may still shift within the limit of the forecast confidence cone.**
- This tropical cyclone will remain far from the Philippine landmass. FRANCISCO is forecast to gradually decelerate while moving generally north northwestward until tomorrow (24 June) morning before recurving towards the Ryukyu Islands in southern Japan. On the track forecast, FRANCISCO will exit the Philippine Area of Responsibility (PAR) on Friday (26 June) morning.
- FRANCISCO may still further intensify or maintain its strength until this afternoon. Afterwards, a weakening trend is expected due to increasingly unfavorable environmental conditions.

Considering these developments, the public and disaster risk reduction and management offices concerned are advised to take all necessary measures to protect life and property. Persons living in areas identified to be highly or very highly susceptible to these hazards are advised to follow evacuation and other instructions from local officials. **For heavy rainfall warnings, thunderstorm/rainfall advisories, and other severe weather information specific to your area, please monitor products issued by your local PAGASA Regional Services Division.**

The next tropical cyclone bulletin will be issued at 11:00 AM today.
